

DATA SCIENCE CONSULTING

A Complete AI Development Service

As the market leader in lightweight and explainable AI, HACARUS is uniquely adept to develop custom AI solutions for clients in a wide range of industries.

Combining vast experience from customer centric AI development with data science expertise, HACARUS possesses the ability to create tailor-made solutions. Our DATA SCIENCE CONSULTING package offers a full range of AI development services including Data collection, Annotation, Data analysis, AI Model Development and Prototype Development.

Value Proposition

Dedicated Team

Dedicated HACARUS project team, committed all the way from inception to completion, with regular status updates and progress reports to ensure constant alignment with project objectives.

Clear IP Retainment

HACARUS conduct ensures that all intellectual property developed, including source code, and future commercialization rights are fully owned and controlled by the client company.

One Stop Solution

HACARUS Data Science Consulting service offers a full suite of AI development expertise, ranging from preparing data, to model creation and analysis – all within the same service package.

Case Studies

“ Our impressions of working with HACARUS is of a company that provides excellent data science expertise through each step of the process – from data processing to analysis of data. The project also provided an opportunity for our R&D institute personnel to get acquainted with Sparse Modeling through the in-house study sessions – knowledge that we will be using in our work moving forward

Hitachi Zosen Corporation

“ HACARUS took into account the characteristics of the data, they could provide a quick response to the entire process from data processing to AI model creation. Many of the AI models and techniques proposed by HACARUS had not been thought of by our company, which led to an improvement in the skills of our staff. We are grateful to HACARUS for their quick response to our requests and questions.

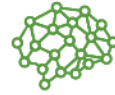

Service Details

Data Collection

Assist in data collection

- Data Assessment
 - Web data scraping
 - Design and implementation of questionnaires
 - Shaping and preprocessing of retained data
- ※ Purchase of commercial datasets costs extra

Data Analysis & AI Model Development

- Analysis Report Creation
 - AI Model Design
 - AI Model Development (*)
 - AI Model Evaluation
 - Support for writing papers
- ※ If you wish to deep learning, customer is expected to deliver requisite hardware platform, at a surcharge HACARUS can assist in Construction and operation of a learning environment for deep learning at client location

Annotation

- Annotation work for videos and images
 - Annotation support when requesting experts
- ※ If large amounts of data need to be annotated in a short period of time, support for inexpensive offshore off-the-shelf annotations based on separate estimates

Prototype application development

- Web application
 - Mobile application (Android / iOS)
 - Desktop application (Windows / Mac / Linux)
- ※ Operation of cloud environment quoted separately.
