

Bringing the next generation of instruments to all industries.

At HACARUS, our aim is to provide truly innovative digital solutions by applying our award winning Sparse Modeling technology.

As a leader in the AI industry, we have contributed to over 100 customer projects since 2014. Through our experience and technical capabilities, we help firms achieve digital transformation objectives. HACARUS solutions are used in the Medical and Manufacturing fields to enable humans to make better, faster and more reliable decisions, based on AI driven insights.
